ASSAB 

Singapore

As a part of the global network of Uddeholm, ASSAB's support is within reach no matter where you are.

ASSAB Singapore

ASSAB's position as an industry leader for the best-known brand in the most demanding tool steel and high performance steel has been further strengthened by our provision of integrated solutions and top-quality metallurgical services for special steel. The essence of the ASSAB offer is the premium special steel supplied by our Uddeholm mill.

ASSAB Singapore houses the latest technologies and expertise at our 64,000 ft² facility. As the central stock and logistics hub for the Asia-Pacific region, ASSAB Singapore has an efficient response order management, automated retrieval, a unique full traceability identification system and a range of value-added services which include machining, heat treatment and technical consulting. ASSAB Singapore ensures that all our operations and services meet the ISO 9001 Quality Management System and OHSAS 18001 Occupational Health and Safety Management System. Together with a comprehensive inventory of tool steel and high performance steel, we are now able to offer higher capacity loads and one-stop solutions for all your steel needs in a shorter lead time.

Products

ASSAB Singapore supplies superior quality plastic mould steel, steel for stamping, pressing, rolling, forming and blanking, hot work steel for die-casting; high performance steel material for critical and demanding applications.

Services

Machining — We pre-machine the tool steel into the most suitable form for the toolmaker. This makes handling and preparation much simpler for the toolmaker and, more importantly, saves delivery time and money.

Heat Treatment — Our state-of-the-art vacuum furnaces provide the most appropriate heat treatment service to realise the quality of the steel and enhance the performance of the tool.

- Hardening and tempering
- Stress relieving
- Subzero treatment

List of Services in Singapore

| | |
|--------------------------|---|
| Stocks | Plastic mould, cold work and hot work application tool steel |
| Delivery | Daily delivery services |
